

Thank you for visiting us!

UpLyft aims to revolutionize patient transfer by making it safer and easier. This is via a mechanized device that can gently and safely lift someone from lying flat in bed to a seated position in a wheelchair and back again.

- Are you a nurse or other professional caregiver? UpLyft will save you time, helping you better serve all of your patients, and it will relieve you of the back injuries that come from manually lifting patients.
- Are you a home caregiver assisting a family member? UpLyft offers you the same benefits it does to professional caregivers, but in the comfort and convenience of your home. And it will make your loved one's day easier and more pleasant as well.
- Do you have a disability rendering you bedridden or wheelchair-bound? UpLyft will not only make transfers easier on you; it will also provide a degree of independent mobility you did not have before.
- Are you a venture capitalist looking for a sound investment? UpLyft has strong patent protection and vast growth potential in its market.

If you are one of the above, this is a spectacular opportunity to become a part of this market-transforming innovation.

Right now, UpLyft has a goal to raise \$1,000,000 to make this revolutionary advancement a reality. This is a product that will **improve lives**, and currently, **there is no other product like it.**

Please join us today to help change health care for the better!
