Title: Website Design Test: Which of these dentists will pass?

Description: A website has 15 seconds to impress a visitor. 15 seconds to convey who they are, what they do, why you should use them, and how to get in touch. It's a tall order and some do it better than others.

At Thrive, we've developed our trusted website sniff test to tell which websites do this well. Today, I'll take you through three dentist's websites to see who passes our test, and who does not.

Spoiler alert: We designed one of these websites.

If you'd like to know more about quickly communicating the essentials of your website view my in-depth blog post here: <https://thrive.design/30-seconds-to-c...>
